# What is RADIUS

# What is RADIUS

## RADIUS

Source: Wikipedia

The bone in the fore arm that forms the elbow articulation with the humerus

# What is RADIUS

Remote Authentication Dial In User Service

# What is RADIUS

## Remote Authentication Dial In User Service

- protocol for AAA  
AuthN, AuthR and Accounting

# What is RADIUS

## Remote Authentication Dial In User Service

- protocol for AAA  
AuthN, AuthR and Accounting
- used for controlling access to networks

# What is RADIUS

## Remote Authentication Dial In User Service

- protocol for AAA  
AuthN, AuthR and Accounting
- used for controlling access to networks
- born in the Internet Dialup times

# What is RADIUS

## Remote Authentication Dial In User Service

- protocol for AAA  
AuthN, AuthR and Accounting
- used for controlling access to networks
- born in the Internet Dialup times
- brought to the present for use with 802.1X

# What is RADIUS role in IdM

what has the network access to do with identity

RADIUS performs the three basic IdM functions

# What is RADIUS role in IdM

what has the network access to do with identity

RADIUS performs the three basic IdM functions, remember?

# What is RADIUS role in IdM

what has the network access to do with identity

RADIUS performs the three basic IdM functions, remember?

- Validates credentials

# What is RADIUS role in IdM

what has the network access to do with identity

RADIUS performs the three basic IdM functions, remember?

- Validates credentials: AuthN

# What is RADIUS role in IdM

what has the network access to do with identity

RADIUS performs the three basic IdM functions, remember?

- Validates credentials: AuthN
- Verifies the principal may use the network

# What is RADIUS role in IdM

what has the network access to do with identity

RADIUS performs the three basic IdM functions, remember?

- Validates credentials: AuthN
- Verifies the principal may use the network: AuthR

# What is RADIUS role in IdM

what has the network access to do with identity

RADIUS performs the three basic IdM functions, remember?

- Validates credentials: AuthN
- Verifies the principal may use the network: AuthR
- Accounts network usage

# What is RADIUS role in IdM

what has the network access to do with identity

RADIUS performs the three basic IdM functions, remember?

- Validates credentials: AuthN
- Verifies the principal may use the network: AuthR
- Accounts network usage: The Log

# What is RADIUS role in IdM

what has the network access to do with identity

RADIUS performs the three basic IdM functions, remember?

- Validates credentials: AuthN
- Verifies the principal may use the network: AuthR
- Accounts network usage: The Log

and it does all that

# What is RADIUS role in IdM

what has the network access to do with identity

RADIUS performs the three basic IdM functions, remember?

- Validates credentials: AuthN
- Verifies the principal may use the network: AuthR
- Accounts network usage: The Log

and it does all that

- for controlling access to the infrastructure

# What is RADIUS role in IdM

what has the network access to do with identity

RADIUS performs the three basic IdM functions, remember?

- Validates credentials: AuthN
- Verifies the principal may use the network: AuthR
- Accounts network usage: The Log

and it does all that

- for controlling access to the infrastructure
- and by using the Directory
