# Sending attributes out the need for a common language

## Sending attributes out

the need for a common language

Interoperability is the degree to which a provider and a consumer can succesfully interface having never met

Coppeto, T.: Introduction To OSID V3 for developers

## Sending attributes out

the need for a common language

Interoperability is the degree to which a provider and a consumer can successfully interface having never met

Coppeto, T.: Introduction To OSID V3 for developers

In order to achieve this, the parties need a common language with semantics and syntax that both of them understand

#### eduPerson schema

Internet2 effort for an standard schema

 Coordinated effort in Internet2, through MACE, for a common higher education person schema definition

#### eduPerson schema

Internet2 effort for an standard schema

- Coordinated effort in Internet2, through MACE, for a common higher education person schema definition
- It is developed with inputs from the global higher education community

#### eduPerson schema

Internet2 effort for an standard schema

- Coordinated effort in Internet2, through MACE, for a common higher education person schema definition
- It is developed with inputs from the global higher education community
- MACE-dir Working Group (by invitation) is the forum for eduPerson related discussion, through list and calls

Need eduPerson SCHAC Why How Parts Whe

## Why SCHAC

if we already have eduPerson?

if we already have eduPerson?

if we already have eduPerson?

The tf-emc<sup>2</sup> group found that there were enough driving needs to start working on harmonizing high education schemas

Many European countries had similar local schemas

if we already have eduPerson?

- Many European countries had similar local schemas
- eduPerson needed some local extensions for Europe

if we already have eduPerson?

- Many European countries had similar local schemas
- eduPerson needed some local extensions for Europe
- There is real need for a common European schema

## How we have designed and created SCHAC from the idea to the published document

## How we have designed and created SCHAC from the idea to the published document

Why How Parts Where Who

## How we have designed and created SCHAC from the idea to the published document

Work was started creating an open SCHAC workgroup seeded with members of tf-emc<sup>2</sup> from each country at hand

Each country offered their schema

Why How Parts Where Who

### How we have designed and created SCHAC

from the idea to the published document

- Each country offered their schema
- Common or useful attributes where selected

### How we have designed and created SCHAC

from the idea to the published document

- Each country offered their schema
- Common or useful attributes where selected
- Care was taken that URN values where used for namespace delegation

### How we have designed and created SCHAC

from the idea to the published document

- Each country offered their schema
- Common or useful attributes where selected
- Care was taken that URN values where used for namespace delegation
- When the group was happy enough, an schema definition was first published
