schacHomeOrganizationType
should it be multivalued?

schacHomeOrganizationType
should it be multivalued?

Quick summary of the discussion on the list

schacHomeOrganizationType
should it be multivalued?

Quick summary of the discussion on the list

- eduGAIN recommends its use on IdPs

schacHomeOrganizationType
should it be multivalued?

Quick summary of the discussion on the list

- eduGAIN recommends its use on IdPs
- institutions usually belong to more than one type

schacHomeOrganizationType
should it be multivalued?

Quick summary of the discussion on the list

- eduGAIN recommends its use on IdPs
- institutions usually belong to more than one type
- UNESCO IESC levels proposed as a first approach

schacHomeOrganizationType
should it be multivalued?

Quick summary of the discussion on the list

- eduGAIN recommends its use on IdPs
- institutions usually belong to more than one type
- UNESCO IESC levels proposed as a first approach
- Thomas L. voices AuthR concerns

schacHomeOrganizationType
should it be multivalued?

Quick summary of the discussion on the list

- eduGAIN recommends its use on IdPs
- institutions usually belong to more than one type
- UNESCO IESC levels proposed as a first approach
- Thomas L. voices AuthR concerns
- OrganizationType is a *property* of the organization

schacHomeOrganizationType
should it be multivalued?

Quick summary of the discussion on the list

- eduGAIN recommends its use on IdPs
- institutions usually belong to more than one type
- UNESCO IESC levels proposed as a first approach
- Thomas L. voices AuthR concerns
- OrganizationType is a *property* of the organization
- A new *beta* version of the schema has been published

schacPersonalUniqueID

a proposal for common values

schacPersonalUniqueID
a proposal for common values

Shall we all use common values for official ID numbers?

schacPersonalUniqueID
a proposal for common values

Shall we all use common values for official ID numbers?

- Univocal identification of individuals

schacPersonalUniqueID
a proposal for common values

Shall we all use common values for official ID numbers?

- Univocal identification of individuals
- A standard exists for the MRZ of ID documents

schacPersonalUniqueID
a proposal for common values

Shall we all use common values for official ID numbers?

- Univocal identification of individuals
- A standard exists for the MRZ of ID documents
- Data entry ease

schacPersonalUniqueID
a proposal for common values

Shall we all use common values for official ID numbers?

- Univocal identification of individuals
- A standard exists for the MRZ of ID documents
- Data entry ease
- No mappings

schacPersonalUniqueID
a proposal for common values

Shall we all use common values for official ID numbers?

- Univocal identification of individuals
- A standard exists for the MRZ of ID documents
- Data entry ease
- No mappings
- Timed validity information available

schacPersonalUniqueID
a proposal for common values

Shall we all use common values for official ID numbers?

- Univocal identification of individuals
- A standard exists for the MRZ of ID documents
- Data entry ease
- No mappings
- Timed validity information available
- Just one value needed in the registry under :int:

The URN prefix RFC

time to defrost

The URN prefix RFC
time to defrost

It has spent spring and summer in the freezer

The URN prefix RFC
time to defrost

It has spent spring and summer in the freezer

- Why?

The URN prefix RFC
time to defrost

It has spent spring and summer in the freezer

- Why? Work load

The URN prefix RFC
time to defrost

It has spent spring and summer in the freezer

- Why? Work load
- Peter Saint-Andre offered help

The URN prefix RFC
time to defrost

It has spent spring and summer in the freezer

- Why? Work load
- Peter Saint-Andre offered help
- I could use some input ;-)

That's all folks!

That's all folks!
Tak!
